

AttackIQ Vanguard Edge (AVE)

AttackIQ Vanguard Edge (AVE) is a scheduled quarterly engagement where your team meets with our experienced Vanguard customer support team to optimize your security program. We partner with you to conduct specific assessments and validate your overall cybersecurity readiness. Together we review the state of your security control validation process, examine how the AttackIQ Security Optimization Platform is delivering value, and identify areas for future work.

Benefits of AVE

Optimize Solution Value and Use

Deliver the best outcomes for your security use cases. We will help ensure that you get the most out of the AttackIQ Security Optimization Platform and leverage all features and capabilities to drive program success and strengthen your cybersecurity posture.

Improve Deployment Maturity

Accelerate your security program's ramp and effectiveness. Quarterly AVE assessments ensure that your security validation program is performing at its best and provides your team with updated training to help them deploy new features quickly.

Strengthen MITRE ATT&CK® Alignment

Gain visibility and actionable insights into your cybersecurity readiness through realistic and specific adversary emulations that map to the MITRE ATT&CK framework. We will work with you to execute assessments and build reports that let you know where your security program stands.

Maximize Your Investments

Get the most of your AttackIQ Vanguard investment. With the solution tailored to your needs and your team equipped with the tools required for effective deployment, the low-cost, high-value AVE engagement helps you maximize your return on investment from the AttackIQ Security Optimization Platform.

Program Overview

Configuration and Support Case Review

Every organization's technology deployment and security validation goals differ. Our Vanguard engineers will review the details of your complete AttackIQ Security Optimization Platform deployment, ensuring that it is aligned to your specific requirements and optimized for your intended use cases with minimal impact to your existing environment. We will brief your team on any open support issues and provide details of our progress in remediation. If platform upgrades are available and useful, we will help you get them installed.

Program Overview (cont.)

New Feature Training

AttackIQ regularly releases new features and functionality. New releases often include new adversary testing content and threat-aligned templates, operational testing capabilities, integrations, reporting, and dashboard updates, as well as resolutions for product and platform issues. During the AVE engagement, your Vanguard team will walk you through these updates and the goal(s) each update will achieve. Your Vanguard team will also train your staff on how to best take advantage of these new functionalities. Your feedback is important to us so we can help ensure your critical needs are captured through our systems development lifecycle.

Vanguard Co-Managed Assessments

AttackIQ will provide specific assessment templates for each co-managed engagement designed to specifically evaluate a customer's cyber-security posture across a basic set of controls and expected functionality, combined with relevant adversarial TTPs. Testing methodology and TTPs are explained, and an analysis of the results are reviewed with your team. Executive reporting provides situational awareness and visibility of the overall security posture and cyber-readiness. Detailed technical reports support operational remediation and assist with guidance for tuning and configuring security controls. Quarterly differential reporting shows progress achieved in the program over time.

Next Steps

Get started with AVE today. Contact your AttackIQ Vanguard service representative to schedule your quarterly assessment.

About AttackIQ

AttackIQ, the leading independent vendor of breach and attack simulation solutions, built the industry's first Security Optimization Platform for continuous security control validation and improving security program effectiveness and efficiency. AttackIQ is trusted by leading organizations worldwide to identify security improvements and verify that cyberdefenses work as expected, aligned with the MITRE ATT&CK framework. The Company is committed to giving back to the cybersecurity community through its free [AttackIQ Academy](#), open Preactive Security Exchange, and partnership with MITRE Engenuity's Center for Threat Informed Defense.
